

# Your **BACK PAIN** relief starts with a superior massage.

Typical Competitors back jets placement

Hydro Massage back massage system jets placement

When you are looking for a jetted bathtub for back pain relief, a few things are critical. These things include the number of jets, jet design, strength, and jet placement. Hydro Massage designs our therapeutic back massage systems to cover all or most parts of your back – your neck, shoulders, mid back, and lower back.

## Jet Design:

Most whirlpool bathtubs only provide very small jets that produce a single stream of water — a little larger than the size of a pencil to a small area on your back. That doesn't provide a true massage benefit. Hydro Massage new technology therapeutic jets each deliver a strong but soothing massage. Because each jet provides a dual pulsating stream of water. Each of our jets covers approximately a 2" diameter area on your back.

## Jet Placement:

Other jetted bathtubs typically have only a few jets on the back of the tub, hitting approximately mid back. If you have back pain in other places, which most of us do, you have less pain relief. Hydro Massage back therapeutic massage system covers a much larger area of the back of the tub — targeting your neck, shoulders, mid back, and lower back. We do really have your back!

Hydro Massage therapeutic back massage system is designed to help:

- target neuromuscular trigger points
- boost circulation
- alleviate pain naturally
- relax tense muscles
- relieve inflammation
- improve spine mobility and flexibility

Our new technology therapeutic jets are standard on our therapeutic series baths. Verify the number of jets and placement before purchase.

*"I suffer from migraines, back and neck problems. Ron and Jenny made sure the jets were placed in the spots I would most benefit from. My headaches have been cut by more than half and my back and neck feel like they used to many years ago."*

# How much better will you feel after a great foot massage?

Did you know your feet have over 214,000 nerve endings? They are connected to all the major organs in your body. Different parts of your feet are reflexology trigger points addressing all parts of your body. It's no wonder sore feet affect everything else! **Hydro Massage designs and places therapeutic jets for your feet to receive the optimum massage that hits most of your trigger points.**

## Jet Design:

Most whirlpool bathtubs only provide very small jets that produce a single stream of water — a little larger than the size of a pencil to a small area on your feet. That doesn't provide a true massage benefit. **Hydro Massage's ultra massage jets provide a soothing massage covering a 3" circle directed at the soles of your feet.** Our other option for feet is our exclusive therapeutic Sole Soother Jets. The sole soother reflexology foot massage system covers a 3.5" circular area to each foot with 7 separate water jets in each sole soother. Its like having 7 fingers massaging the sole of your foot.

## Jet Placement:

Other jetted bathtubs typically have only a few jets at the front of the tub at the same level all the way around, which can hit more on the tips of your toes than the soles of your feet. **Hydro Massage foot jets target the right places with a strong yet soothing pulsating water massage. It makes a difference when those nerve endings get massaged!**

## Reflexology Trigger Points

Hydro Massage therapeutic foot massage system is designed to help:

- target neuromuscular trigger points
- boost circulation
- alleviate pain naturally
- relax tense muscles
- relieve inflammation

## Treat Your Feet Right!

*"There isn't a feature I don't like, but I have to say my favorite is the the Sole Soother. I love having my feet massaged!!"*

Our new technology Ultra Massage jets are standard on our therapeutic series baths. Our therapeutic Sole Soother jets are standard on our combination and platinum series baths. Verify the jet type before purchase.
